Support for Big-Bags: Quick and Safe

Big bags are used in agriculture, gardening and landscaping as well as in logistics for bulk goods such as sand, stones, gravel, seeds, fertilisers and much more.

The support arms are designed for a load capacity of up to 1,500 kg. The **self-locking heavy-duty hooks** (*galvanised safety flap*) reliably hold the carrying loops of the big bags and protect them from damage.

The bags are also kept open at the top for easy filling. The hooks on the lower perforated strips can be adjusted to accommodate smaller packages, for example.

For easy transport or filling of the flexible containers, you can obtain from Schneider::

- a sturdy **support for big bags**
- alternatively individual **support arms** with ISO / FEM 2 brackets

The support arms fit perfectly on the different **pallet fork carrier** (125.023.100, .750, .850, .950).

Pallet Fork Carrier Art. No.	Bracket	Width (mm)	Load capacity (kg)	Weight (kg)
125.039.000	Euro	1.080	1.500	113
125.039.200	ISO / FEM 2	1.200*	1.500**	37

* width of the pallet fork carrier

** with 2 support arms
