

Coloured kits

Already from 1 piece!

Quite a few of your customers want to use coloured vehicles for their own external presentation. Sometimes, however, the paint booth is a bottleneck factor in the operation, especially as the shortage of skilled workers makes its way through here.

Above all, however, other work in terms of business management such as. For example, refinishing is often more lucrative than painting a new body.

For this reason, AluTeam now offers you factory-made, beginning from one kit, all wall panels coloured (outside) in a **high-quality powder coating**.

As with the well-known white shades RAL 9010 or MB 9147, the powder coating is applied electricaly and burned in the oven. All common RAL shades except fluorescent colours are available.

Realize significant savings and **optimizations** in your production. Improve your competitive position. **AluTeam is your partner for success.**
